

Thule OutPace tilt (3-bike) 9013200 (RHD)

Thule OutPace is a lightweight and compact bike platform with the capability to transport up to three bikes.

1. Supports a wide range of bike frame geometries from 20mm to 90mm diameter thanks to the versatile wheel strap
2. Moveable head that rotates, slides, and adjusts flexibly to fit different bike sizes and styles, making sure it always finds the perfect position on the frame
3. Tilts up towards the car when parked, making it ideal for urban use. Note: The bike carrier must not be driven in the upright position; this feature is for parking only
4. Carrier tilts down to allow access to the trunk at all times
5. You can load and unload up to two bikes in any order – all types of frames and geometries are supported
6. Carrying handle and lightweight design for easy handling and installation, making it perfect for casual use
7. The parking slot for the wheel strap keeps the wheel straps neatly tucked away while loading bikes. The ratcheting pump buckles and wheel straps make it easy to fasten tires up to 3"
8. Easy to mount on towbar from a vertical position
9. Folds into a compact unit for easy storage in tight spaces
